

Detailed Agile Templates Handbook

This handbook provides practical Agile and Scrum templates with detailed explanations. It is designed for Scrum Masters, Agile Coaches, Delivery Managers, Project Managers, and Agile teams working in real-world delivery environments.

1. Sprint Planning Template

Purpose: Used to prepare and align the team before the sprint begins.

Field	Explanation
Sprint Goal	Defines the business objective for the sprint.
Sprint Duration	Length of the sprint, usually 2 weeks.
Committed Stories	List of stories selected for delivery.
Capacity	Available bandwidth of team members.
Dependencies	External or internal dependencies.
Risks	Potential issues affecting sprint delivery.
Definition of Done	Completion criteria for stories.

Best Practices:

- Ensure stories are refined before planning.
- Avoid overcommitting the team.
- Validate dependencies early.

2. Daily Scrum Template

Purpose: Helps the team synchronize progress and identify blockers.

Question	Purpose
What did you complete yesterday?	Tracks completed work.
What will you work on today?	Provides daily visibility.
Any blockers?	Identifies impediments quickly.
Any support needed?	Encourages collaboration.

Best Practices:

- Keep the meeting under 15 minutes.
- Focus on coordination, not problem-solving.
- Encourage concise updates.

3. Sprint Retrospective Template

Purpose: Used to identify improvements after each sprint.

Category	Example
What went well?	Strong team collaboration.
What can improve?	Better requirement clarification.
Action Items	Reduce story spillover.
Owner	Responsible individual.
Target Date	Deadline for improvement action.

Best Practices:

- Create a psychologically safe environment.
- Focus on actionable improvements.
- Track retrospective action items.

4. RAID Log Template

Purpose: Tracks Risks, Assumptions, Issues, and Dependencies.

Type	Explanation
Risk	Potential future problem.
Assumption	Condition believed to be true.
Issue	Current active problem.
Dependency	Reliance on external teams or tasks.
Mitigation	Action plan to reduce impact.

Best Practices:

- Review RAID log weekly.
- Escalate high-impact risks early.
- Assign clear ownership.

5. User Story Template

Purpose: Captures business requirements from the user perspective.

Component	Description
As a...	Defines user role.
I want...	Desired functionality.
So that...	Business value or outcome.
Acceptance Criteria	Conditions for completion.
Priority	Business importance level.

Best Practices:

- Keep stories small and testable.
- Use clear acceptance criteria.
- Avoid technical implementation details.

6. Definition of Done (DoD) Template

Purpose: Ensures consistent quality standards across the team.

Checklist Item	Purpose
Code Reviewed	Improves code quality.
Unit Tested	Validates functionality.
QA Validated	Ensures defect-free delivery.
Documentation Updated	Maintains knowledge sharing.
Deployment Ready	Ready for release.

Best Practices:

- Make DoD visible to the team.
- Review periodically for improvements.
- Apply consistently across stories.

7. Stakeholder Communication Plan

Purpose: Defines communication structure for stakeholders.

Field	Explanation
Stakeholder Name	Business or technical stakeholder.
Communication Type	Email, meeting, report, etc.
Frequency	Daily, weekly, monthly.
Owner	Responsible communicator.
Escalation Path	Issue escalation hierarchy.

Best Practices:

- Maintain transparency with stakeholders.
- Provide concise status updates.
- Escalate blockers proactively.

8. Agile Metrics Dashboard

Purpose: Tracks Agile delivery health and performance.

Metric	Purpose
Velocity	Measures sprint throughput.
Burndown	Tracks sprint progress.
Cycle Time	Measures story completion time.
Defect Leakage	Production quality indicator.
Predictability	Planned vs delivered work.

Best Practices:

- Use metrics for improvement, not blame.
- Review trends instead of isolated numbers.
- Keep dashboards simple and actionable.

This handbook can be uploaded to GitHub repositories, used for Agile coaching, interview preparation, team onboarding, delivery governance, and Agile transformation initiatives.
